Acknowledgements

Estimates made by the Ohio Agricultural Statistics Service are based on information supplied by farmers and agri-businesses. These estimates are the result of the data collected on probability designed surveys. Considerable information is collected from farmers randomly selected for telephone or personal interviews. Data for county estimates are collected from a large mail survey and, where available, check data are used to the extent possible. Our sincere thanks are also extended to the office staff, field and telephone interviewers of the Ohio Agricultural Statistics Service.

TABLE 1

Ohio Historical Agricultural Statistics

Year	Number of Farms	Corn Acres Harvested (000)	Corn Grain Yield Bu./Ac.	Soybean Acres Harvested (000)	Soybean Yield Bu./Ac.	Winter Wheat Acres Harvested (000)	Winter Wheat Yield Bu./Ac.

OHIO 2002 CROP SUMMARY

Persistent rain showers during the months of April and May caused many of the State's row crops to be planted well behind historic State averages. The rain showers lasted throughout the first half of June before giving way to drought like conditions which gripped the State for most of the summer growing season. By the end of July, rainfall amounts were running behind normal in the Northwest, North Central, Central, Central Hills, and Northeast Hills districts. The lack of moisture during the growing season led to disappointing crop yields throughout the State and forced many livestock producers to feed hay much earlier than normal due to poor pasture conditions. The dry conditions caused crops to mature rapidly which allowed producers to harvest them much earlier than normal.

Winter Wheat planting trailed the five-year average for most of the fall but the majority of growers were able to get their acreage planted on time. By March 31, 5 percent of the acreage was jointed, slightly ahead of the previous year and in line with the State's five-year average. Harvesting activities began around June 30, two days behind the previous year and six days behind the five-year average. Harvesting was 99 percent complete on July 21, slightly ahead of 2001 and nearly 12 days ahead of the five-year average. Producers harvested 810,000 acres, 90,000 acres less than in 2001. The State yield of 62 bushels per acre was five bushels below both 2001 and the State's five-year average yield. Total production of 50.2 million bushels was 17 percent below 2001.

Corn planting ran three weeks behind normal for most of the Spring with 97 percent planted on June 16. Ninety-eight percent of the acreage had emerged on June 23, this was 24 days behind the previous year and nine days behind the five-year average. Farmers began harvesting corn for silage around August 18 and finished around October 13. This ending date was nearly 10 days ahead of last year's pace and 17 days ahead of the five-year average. One percent of the acreage was harvested for grain on September 15. This was three days behind last year's start and 10 days behind the five-year average. Most growers had finished by the third week in November. The average yield for grain and seed was estimated at 88 bushels per acre, down 50 bushels from the previous year and the lowest State yield since 1988 when growers averaged 85 bushels per acre. Producers harvested 2.87 million acres for grain, compared to 3.17 million acres in 2001. Total production of 252.6 million bushels, was 42 percent below 2001 and the lowest State production since 1983 when 224.0 million bushels were produced. Acreage harvested for silage was estimated at 270,000 acres, up 100,000 acres from the previous year and the highest acreage since 1981 when 285,000 acres of silage was harvested. Poor yield potential brought on by a summer drought was the main reason for the increase in silage acreage.

Last year's unusual season of excess rain during the spring planting season and drought conditions during the growing season followed by more wet weather at harvest time, resulted in some of the poorest yields for corn and soybeans since 1988.

Total grain corn production was the lowest in 19 years and soybean yields were the lowest in 14 years.

Ninety-seven percent of the State's **Soybeans** were planted on June 23, in line with both last year and the five-year average. However, planting ran nearly three weeks behind normal throughout the Spring due to extremely wet field conditions. Soybeans were 99 percent emerged on July 7. This was seven days behind last year and slightly behind the five-year average. The soybean harvest began around September 15 and progressed to 96 percent complete by November 17. Producers harvested 4.71 million acres in 2002 and reported an average yield of 30 bushels per acre. This was 11 bushels below the final 2001 yield, and the lowest State yield since 1988 when yields averaged 27 bushels per acre. Total production was estimated at 141.3 million bushels down nearly 25 percent from the 187.8 million bushels produced in 2001.

Six percent of the **Oat** crop was planted by March 31. This was nearly identical to 2001 but slightly behind the State's five-year average. Ninety-nine percent of the acreage was planted by June 2. Planting ran well behind normal due to wet field conditions during the Spring. Oats were 1 percent emerged by April 7, one day behind last year and three days behind the five-year average. Six percent were harvested July 14, and most growers were finished by the end of August. Total production of 3.72 million bushels, was down 40 percent from 2001 and the lowest State production on record. Harvested acreage dropped to an all time low of 60,000. The average State yield of 62 bushels per acre was 11 bushels below 2001 and the lowest yield since 1996 when growers reported 57 bushels per acre.

The first cutting of **Alfalfa** got off to a slow start but 98 percent had been complete by June 30. This was a week ahead of both the previous year and the State's five-year average. The 2nd cutting was complete around August 11, and the 3rd cutting ended around September 22. Those who were able to get a fourth cutting finished up near the end of October. The first cutting of all **Other hay** was 1 percent complete on May 19, a week behind 2001 and eight days behind the five-year average. It progressed to 99 percent complete on July 14, in line with last year and slightly ahead of the five-year average. The 2nd cutting was 95 percent complete on September 1, while the 3rd cutting was 98 percent complete on October 20. Alfalfa yields averaged 3.0 tons of dry hay per acre for the year, while all Other hay averaged 2.2 tons per acre. Production of **All hay** dropped 12 percent from 2001 to 3.75 million tons.

Burley Tobacco production fell 19 percent from 2001 to an estimated 9.63 million pounds. Harvested acreage fell to 5,500 acres in 2002 compared to 6,100 acres harvested in 2001, while yield dropped from 1,960 pounds per acre in 2001 to 1,750 pounds per acre in 2002. **Sugarbeet** production was estimated at 37,000 tons. This was up significantly from the previous year mainly due to the increase in harvested acreage from the 600 acres in 2001 to the 1,800 acres in 2002. Ohio's **Potato** production in 2002 was estimated at 1.01 million cwt., a decrease of 8 percent from 2001. Harvested potato acreage was estimated at 4,200, down 100 acres from 2001. The average yield was reported to be 240 cwt. per acre, down 15 cwt. from last year.

Production of Ohio's **Fresh Market Vegetable** acreage was 29,570 acres in 2002, down 10 percent from 2001. Total fresh market production increased three percent to 5.48 million cwt. With the exception of bell peppers and fresh tomatoes, Ohio vegetable growers produced less cabbage, onions, pumpkins, sweet corn and squash, in 2002 than last year. Squash, sweet corn, pumpkins, and cabbage prices were up, while bell pepper, onions and fresh tomatoes were lower than last year. Total farm value for fresh market vegetables in 2002 was \$143 million, up six percent from last year. Sweet corn and tomatoes accounted for 71 percent of the fresh market acres harvested, and 68 percent of Ohio's total fresh market production in 2002.

Sweet Corn acres harvested decreased 1,000 acres from 2001 to 14,400 acres. Yield per acre increased two cwt. per acre to 87 cwt. per acre. Sweet corn production decreased four percent to 1.25 million cwt., and price of \$21.20 per cwt. up 2.80 per cwt. in 2001.

Fresh Market Tomato acres harvested increased 800 acres from 2001 to 6,700 acres. Yield was 370 cwt. per acre, up 12 percent from 2001. Production increased 27 percent from 2001 to 2.48 million cwt. in 2002. Price per cwt. was \$36.00, \$1.90 below 2001.

Apple growers produced an estimated 77.0 million total pounds in 2002. Total apple production is 10 percent below 2001 and 25 percent below 2000. The value of utilized production is estimated at \$19.9 million, slightly above 2001.

Peach growers produced an estimated 9.4 million pounds in 2002, 16 percent below 2001. The value of utilized production is \$4.51 million, 16 percent lower than last year.

Strawberry growers produced an estimated 39,000 cwt. in 2002, down 15 percent from 2001. The value of utilized production is 4.84 million, slightly above 2001.

Grape production decreased three percent from 2001 to 5,800 tons. Of the total production, 100 tons were utilized for fresh market and 5,700 tons were processed. The value of utilized production is estimated at \$2.21 million, eight percent higher than last year

Total hay production for the state was down 12 percent from 2001. Most producers were lucky to get 3 cuttings of hay. Yields for burley tobacco were down 11 percent and potato yields dropped 6 percent from 2001.

Last summer's drought had an adverse effect on fruit and vegetable production.

TABLE 5

Annual Summary: Crop Production and Value Ohio 2001-2002, United States 2002¹

Crop	Ohio			U.S.	Ohio		U.S.	Unit ³
	Acres Planted	Acres harvested		2002	Yield per acre		2002	
	2002	2001	2002		2001	2002

2002 LIVESTOCK, DAIRY AND POULTRY SUMMARY

Highlights of Ohio's livestock statistics include cattle inventories falling to an all-time record low. Dairy cow numbers remained constant at 260,000 head, but production per cow rose over three percent and total production was up 180 million pounds from last year. Sheep inventory numbers were the highest they've been since 1997. Hog numbers rose slightly over last years record low, but cash receipts declined 25 percent.

Cattle and calf inventories , at 1.22 million, are at an all-time record low. Ohio cattle & calves, in January 2003, dropped two percent below last year's 1.25 million head. Ohio ranks 28th in the nation for cattle inventory. Ohio had 26,000 cattle operations in 2002, 1,000 fewer than last year. Since 1993 , Ohio has lost an average of 1,000 operations a year. The total inventory value of cattle and calves on January 1, 2003, dropped to \$988.2 million, nine percent below January 2002. Cattle inventory values decreased seven percent from \$870 per head in January 2002 to \$810 per head in January 2003.

Milk cow numbers remained constant at 260,000 head in January 2002 and 2003. In 2002, total milk production for Ohio rose four percent and milk per cow increased over three percent. Milk prices, however, dropped from an average of \$15.20/cwt in 2001 to \$12.60/cwt in 2002. This is a 17 percent decline from last year. Wayne county continues to lead the state in dairy cows followed by Homes and Mercer counties , respectively.

Hog inventory increased from last years inventory of 1,430,000 head in December, 2001, to 1,440,000 head in December, 2002. This is a one percent increase from the previous year. Hog operations declined 8 percent from 4,900 farms in December 2001 to 4,500 farms in December 2002. Hog prices dropped an average of \$10.50/cwt from a year earlier. Hog prices fell from \$43.70/cwt in 2001 to \$33.20/cwt in 2002, down 24 percent from the previous year. Cash receipts also decreased 25 percent from last year. Mercer, Darke and Fulton counties, respectively, continue to be the leading hog counties in Ohio.

Sheep and Lamb inventories increased from 140,000 head in January 2002 to 150,000 head in January 2003, up seven percent. In 2003, breeding stock inventories rose four percent and the 2002 lamb crop rose eight percent. Sheep operations declined three percent to 3,500 in 2003, but inventory value remained constant at \$136/head. Although Ohio numbers peaked in 1868 at 9.00 million sheep, U.S. numbers peaked in 1942 at 56.2 million. Ohio ranks 12th nation wide in sheep numbers, but remains the leader in the Eastern United States. The leading 3 counties for breeding stock numbers are Knox, Harrison and Wayne, respectively.

Total **Laying Hen** numbers decreased slightly from 38.0 million head in December 2001 to 37.9 million head in December 2002, down less than one percent. Ohio ranks number 2 in the U.S. for laying hens and egg production. Total egg production increased slightly from 7.90 billion eggs in 2001 to 7.94 billion eggs in 2002. Ohio still supplies 9.2 percent of the nations eggs. **Turkey** numbers in Ohio increased from 4.80 million birds in 2001 to 5.40 million birds in 2002. This is a 15 percent increase from last year.

Bee Colonies remained the same for 2002 at 16,000 colonies. Yield per colony was 81 lbs. per colony and production was 1.30 million pounds which was also the same as last year. Honey stocks increased slightly, but price per pound soared from \$1.01/lb. in 2001 to \$1.40/lb. in 2002. Total value of production jumped from \$1.31 million to \$1.81 million, up 39 percent.

Cattle numbers in Ohio set an all-time record lows in January 2003. Dairy cow inventory remained constant but milk prices are down sharply. Ohio remains the leader in Swiss cheese production and second in sherbet production.

December hog inventory up one percent from last year's all time record low. Prices are down 24 percent from last year.

Sheep and lamb numbers were up seven percent in January 2003. Breeding stock and lamb crop are up four and eight percent, respectively, but value per hand remained constant.

Ohio ranks second in total egg production, and supplies over 9 percent of the nations eggs. Total laying hen numbers have dipped slightly, but turkey numbers are up sharply.

Bee colonies, yield and production in 2002 remained the same as 2001. Prices, on the other hand, are up dramatically.

September	30,383	30,864	2,182	2,142	663	661
October	30,375	30,647	2,245	2,144	682	657
November	30,123	30,645	2,184	2,105	658	645
Total ²	30,160	30,479	262	261	7,900	7,940

^{1/} December preceding year. ^{2/} For layers columns this is average for the year. For eggs per 100 layers columns this is total egg production divided by average number of layers on hand.

TABLE 47

Egg Production, Price and Value, Ohio and United States, 2001-2002¹

Item	Ohio		United States	
	2001	2002	2001	2002
Eggs produced (million eggs)	7,900	7,940	85,745	86,698
Price per dozen (cents)	49.1	44.7	62.2	59.0
Value of production (000 dollars)	323,242	295,765	4,446,312	4,262,662

^{1/} Estimates cover the 12 month period Dec. 1, previous year through Nov. 30.

TABLE 48

Broiler Production, Price and Value, Ohio and United States, 2001-2002¹

Item	Ohio		United States ²	
	2001	2002	2001	2002
Number produced (000 head)	40,100	39,000	8,389,090	8,590,180
Pounds produced (000 pounds)	212,500	214,500	42,445,800	44,050,400
Price per pound (cents) ³	39.0	30.0	39.3	30.5
Value of production (000 dollars)	82,875	64,350	16,693,515	13,434,771

^{1/} Broiler production including other domestic meat-type breeds. ^{2/} Excludes states producing less than 50,000 birds. ^{3/} Live-weight equivalent price.

TABLE 49

Turkey Production, Price and Value, Ohio and United States, 2001-2002

Item	Ohio		United States	
	2001	2002	2001	2002
Number produced (000 head) ¹	4,800	5,400	272,059	272,429
Pounds produced (000 pounds)	181,440	207,360	7,154,781	7,406,050
Price per pound (cents) ²	35.0	35.0	39.0	36.5
Value of production (000 dollars)	63,504	72,576	2,790,317	2,700,333

^{1/} Based on turkeys hatched September 1, previous year, through August 31, current year. Excludes young turkeys lost.

^{2/} Liveweight equivalent price.

TABLE 50

Number of Layers by District, Ohio, December 1, 1998-2002

District	Hens and Pullets of Laying Age				
	1998	1999	2000	2001	2002
	Thousand				
10 Northwest	1,270	1,240	1,190	1,100	1,110
20 North Central	2,310	3,030	2,770	3,050	2,330
30 Northeast	330	1,180	1,110	1,050	1,460
40 West Central	18,520	16,480	15,280	14,600	15,350
50 Central	7,070	8,830	8,330	10,050	10,320
60 East Central	270	360	240	230	220
Southern Region ¹	337	212	211	210	205
State	30,107	31,332	29,131	30,290	30,995

^{1/} Includes Districts 70 Southwest, 80 South Central and 90 Southeast.

TABLE 51

Bee Colonies and Honey Production, Ohio, 1998-2002¹

Year	Honey Producing Colonies	Yield Per Colony	Production	Stocks Dec 15 ²	Average Price Per Pound ³	Value of Production
	Thousand	Pounds	Thou. Pounds	Thou. Pounds	Cents	Thou. Dollars
1998	18	78	1,404	702	83	1,165
1999	20	74	1,480	784	72	1,066
2000	18	65	1,170	585	79	924
2001	16	81	1,296	505	101	1,309
2002	16	81	1,296	518	140	1,814

^{1/} For producers with 5 or more colonies. ^{2/} Stocks held by producers. ^{3/} Prices weighted by sales.

^{1/} Export shares for Ohio were derived from the State's contribution to national production. They do not show actual State exports, but instead reflect the pro-rated stake in the national export total. ^{2/} Unmilled flour, Bulgar, other wheat products. ^{3/} Includes corn, barley, oats, grain, sorghum, and other coarse grain products. ^{4/} Soybeans, soybean meal, and soybean oil. ^{5/} Distribution of furskins to the State pro-rated level includes mink pelts. ^{6/} Primarily bean, vegetable, and grass seeds. ^{7/} Mainly miscellaneous animal, vegetable, and tropical products.

^{1/} A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. ^{2/} Final sector output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

TABLE 61

Farm Assets, Debts and Ratios, Ohio, 1998-2001 U.S. 2000-2001
